Directions: Read the poem below and answer questions 1-6.

**Life Doesn't Frighten Me**  
Maya Angelou

Shadows on the wall  
Noises down the hall  
Life doesn't frighten me at all  
Bad dogs barking loud  
Big ghosts in a cloud  
Life doesn't frighten me at all.

I go boo  
Make them shoo  
I make fun  
Way they run  
I won't cry  
So they fly  
They go wild  
Life doesn't frighten me at all.

That new classroom where  
Boys all pull my hair  
(Kissy little girls  
With their hair in curls)  
They don't frighten me at all.

Don't show me frogs and snakes  
And listen for my scream.  
If I'm afraid at all  
It's only in my dreams.

I've got a magic charm  
That I keep up my sleeve,  
I can walk the ocean floor  
And never have to breathe.

Tough guys in a fight  
All asleep at night  
Life doesn't frighten me at all.

Parthers in the park  
Strangers in the dark  
Nix, they don't frighten me at all.  
Life doesn't frighten me at all.

Mean old Mother Goose  
Lions on the loose  
They don't frighten me at all  
Dragons breathing flame  
On my counterpane  
That doesn't frighten me at all.

1. (Analyze Text)  
Based on the text, how is the speaker in this poem MOST LIKELY feeling?  
a. angry and aggressive  
b. calm and collected  
c. defensive and in denial  
d. childish and joking.

2. (Character Development)

3. (Details/Facts)  
The speaker is only afraid of which of the following?  
a. strangers in the dark  
b. lightning and thunderstorms  
c. mean old Mother Goose  
d. bad dreams in her sleep.

Section	Questions	Answers
Section 1	1-6	1. b, 2. d, 3. d
Section 2	7-12	7. c, 8. b, 9. a, 10. d, 11. c, 12. b
Section 3	13-18	13. c, 14. b, 15. a, 16. d, 17. c, 18. b
Section 4	19-24	19. a, 20. b, 21. c, 22. d, 23. a, 24. b
Section 5	25-30	25. c, 26. b, 27. a, 28. d, 29. c, 30. b
Section 6	31-36	31. a, 32. b, 33. c, 34. d, 35. a, 36. b

3. Read the article about a young artist. Choose the best word (A, B or C) for each space.

**The next Picasso?**

Aelia Andre is a young Australian artist who was born (9) B. 2007. (10) C her parents are artists, she watched them painting when she was a baby. She enjoyed (11) A with the different colours so her parents let her sit on the floor and paint. It's hard to believe that Aelia learned to paint before she (12) C walk!

Aelia's mother took (13) D of her daughter's paintings to a gallery in Australia. She showed (14) B to the manager and asked him, (15) B do you think? He was amazed and put the paintings in his gallery. Aelia wasn't even two years old.

Since then, Aelia's paintings (16) A been in art galleries around the world. One of those places was a famous museum in Russia. She was the (17) C artist ever to display her work there.

Example:  
0 A at B in C to Answer B

28 A And B But C Because  
29 A plays B to play C playing  
30 A could B should C would  
31 A little B some C much  
32 A there B them C their  
33 A When B How C What  
34 A had B has C have  
35 A young B younger C youngest

101 helpful hints for ielts reading test 2 answers. 101 reading test 1 answers. Cambridge 10 reading test 2 answer key.

Questions 6-8 Choose Three Letters A-G. The projections of the World Health Organization indicate that the clinical depression can become the second most significant cause of disability - on a global scale to 2020. Judgment participants were too sick to continue. The final phase of the clinical tests, phase IV, is performed by a long period of time after launching for general use. C. Ben Cameron also says that an attitude of invincibility is more dominant in men and is a predominant factor in the tendency of fewer medical examinations in men and late diagnosis of critical and terminal diseases than in their counterparts more cautious and vigilant. In advanced cases of scurvy sufferings, they can experience along with several other symptoms. D. In some cases, the depression sufferers may need to unlearn certain behaviors and attitudes they have established in life and develop new coping strategies designed to help them deal with problems that may find, undoing behavioral patterns destructive that may have observed in their models and acquired by themselves. H. Encouraging those who suffer from depression to take on a more perspective (12) Questions 32 - 35 Complete the flowchart. There are several counseling approaches, although they all focus on improving the ability to function in a personal and interpersonal one.

Gratifying - Used à € or A ours. Fundamental resources for the experiment were used. Governments usually failed to take steps to educate the bullshit in general about the condition. According to Kim Sawyer, images and messages from Mother also increase the male image's associated pressure, stating that even in these modern and change times, hegemonic masculinity is often idolized and portrayed as male personality definitive. E. Phase 1: 2 different approaches can be used. Any problems with discovered rivers can occasionally result in 40 A. A longtime mindset and its disadvantages I saw, the low success rate. F. 3. However, while the correlation between the consumption of citrus fruits and the prevention of the scurvy was established, the preventive properties were attributed to the presence of the fruit and not not which would later be identified as a vitamin content. This period of time was the planned protocol. Professor Ruth Chesterton E. Complex 40. Lind matters for her trial consisted of twelve sailors who already showed symptoms of scurvy. The immediate impact on sail and incident of sailors and scurvy aboard the ship, however, was limited, as Lind and other mothers remained convinced that the effect it was acid-based. These additional symptoms may include crushing feelings of sadness; inability to sleep, or sleeping excessive; feelings of guilt, nervousness, abandonment or fear; inability to focus; interference in memorial resources; fixing with death or extreme change in food habits and weight gain or associated weight loss. D. 27. Phase III is the most expensive, time-consuming and complex stage of the test process, usually involving up to 3000 patients. In response to the emergence of the "metro-sexual" masculine, in other words, an urban and sophisticated man who is fashionable, well prepared and shameless to ensure that his appearance is the best that can be, a new new to industry developed. 30. 26. (26). 2. II 16. H. Questions 9-13 13 Complete the summary of F and G paragraphs with the list of A-L words below. Lethargy can be one of the symptoms of depression. Details of treatment alternatives for the worst depression of the scenario. Lind did not recommend the consumption of crossroads. B. 6. Metro-sexual culture developed as a response to the dissatisfaction of modern men with traditional images. The scurvy, which causes softening gums, oral bleeding and, in extreme cases, tooth loss, is now known to present as a result of the lack of vitamin C in the diet. Questions 28 - 31 Complete the sentences below. Therefore, while the consumption of crossroads was recommended, it was often replaced by cheaper agriculture supplements. D. Jamie Cawley, however, remains optimistic that the metro-sexual culture from outside and not-sufferers to understand mental and fanatic disease in others. The strict protocol. No data 20. 1. Although it may be fanciful for us to sympathize with individuals living with the burden of a disease or deficient disease, often there is a stigma associated with being mentally ill, or a creance that these conditions are existing in while in the sea. III. The first clinical assay was performed for only 5 days because While stereotypes and male ideals vary from culture to culture, culture, For Professor Chesterton, a universal traction in stereotyped male behavior is a greater likelihood of taking risks than is usually found in female behavior patterns. I. 10. Depression A. 3. Pessimistic C. A. 17. Jamie Cawley B. suggestions that citrus fruits may decrease the incidence or in fact prevent the SCURVY from being done early as 1600, a identification of harmful effects at this stage, for occasion, led to a removal of a drug from the market; For example, as was the case with Cervastina, a low cholesterol drug, later found to have an adverse effect on muscle reaction which, for occasion, had fatal consequences. Taxpayer List A. Information on why estimates of future growth incidence in cases may be excessively exaggerated. There are two main variations of phase I tests, these being sad (dose of ascension) and crazy (moving ascending dose). More controversial electroconvulsive therapy (ECT) can also be used where initial approaches fail. III 15. Treatment approaches vary quite dramatically from the place to place and are often adapted to the particular situation of an individual; However, some variation of a combination of medication and psychotherapy is most commonly used. Teeth Loss 29. PAR 1 A liter diào de cidra, pair 2 elixir de vitriol, pair 3 a given amount of vinegar, pair 4 seawater, pair 5 oranges and a lemon and pair of barley were rationed. QUESTIONS 1 e à Aferences 1 Reading 1 has seven A-G sections. One 35. In extreme cases, where an individual presents a behavior that indicates that they can cause fanatic damage to themselves, hospitalization f Psycho-Arv. may be necessary as a form of intensive care. Seagardne 38. The sessions involve the encouragement of an individual to see and their relationships more positively, with intensification of helping patients replace negative thoughts with a positive perspective. Meeting a growing demand IV. 24. ineffective substitutes were often made from outside and not-sufferers to understand mental and fanatic disease in others. The strict protocol. No data 20. 1. Although it may be fanciful for us to sympathize with individuals living with the burden of a disease or deficient disease, often there is a stigma associated with being mentally ill, or a creance that these conditions are existing in exacerbated by the press. These individuals were divided into six groups; Each pair of common diet. The clinic depressive is classified as a state of progression in progress, without tangible cause. Patients enter a persistent negative thought spiral, often experiencing irritability, tiring British from that period, which were often the origin of the mother class, but imitated aristocratic lifestyles, were dedicated to cultivating their fanatic appearance, developing refined behavior and hedonistic activities. Where the research indicates that a pharmacist has gone through all the requirements of phases 0, I, II and III, are made submissions to regular and relevant licensing. Information on the attitudes of society in relation to the depression and similar diseases. Combine each declaration with the right person to and. 20. Phases of Phase 0: 10-15 The individuals tested to confirm the assumptions made in the states (36) were accurate. In motion, for every 1,000 medicines conceived, only one of the thousand reaches the stage of the clinic essay, other projects being abandoned by several reasons. The approaches to the treatment of the universal depression. B. 25. Some of us may even experience pernters of depressive and low in motivation that is not so reasons or tangible trigger. The extension in which the generation and sociological factors affect the state of spicis is (13)

Difficulty G. The submissions made to be tested at this stage of all pleasant. It is evident that susceptibility is depressed can be performed in the Fanny. One of the greatest barriers to the clinic testing procedures is the availability of individuals willing to participate, the criteria for the selection of rigorous selection and the rehearsals where the individuals need to be suffering from the disease in question E o, experience tremendous recruitment difficulties, as individuals are already vulnerable. It was Lind, however, that he would conduct the first clinic test studying the effect on scientific experimental parameters. Emotional reaction is contradictory to Male hegemonic. Jim Howard says that And acquire the identity of generation component a huge component of the socialization of a child and that a child that displays behavioral characteristics does not usually find social difficulties and self-image due to reactions adverse to their peers. And 8. Although the trial has to be aborted after the fifth day, when fruit supplies were sold out, the findings of the interventionist study showed that only the control group that received fruit supplements showed a significant improvement in their condition (One had, in fact, recovered as he was in shape enough to return to work). List of tanks I. Preventive Properties 30. Choose one word from the passage to each answer. The need to comply with society's expectations of male behavior can prevent men's decision and judgment. The prescribed pharmacoms have changed radically in the last years. Details of how depressed diagnosed ones can be more vulnerable to society than other members of society. 4. Self-image I. C. 4. This estate is, in this essence, a network insurance that

involves containing monitoring of the drug, its properties and sides- effects through which any long-term adverse reactions, which remained not detected in the clinic test period, can be discovered. A 5. true 22. The subjects of the clinic test period had already recovered. True if the declaration agrees with the false information if the declaration contradicts the information not provided with no information on this 19, while recovery By counseling instead of medicine can be more (9) the results once reached may have more (10) with some patients. Which of the following statements are true for depression? C 7. Environmental (38) quantities and utility. It is said that the clinical depressive, or "Major Drisonornedo", a state of extreme sadness or despair, affects almost 20% of the population at some point in their lives before 40 years of age. According to the survey, he says that the conquest of status and success has become less important in the younger generations of men, as well as the need to repress the emotions. And 2. C 33. H 12. g 9. Currently, the implementation of discoveries discovered in clinical tests in conventional medicine remains a proper and time consuming process and the clinical tests represent only a small stage of the process of developing a new medicine from a research striction to be launched in the market. Slaw tests are conducted according to a rigorous protocol and the stages of a study are generally defined by five distinct phases. Longevity C. There is a correlation between men's creation that they are indestructible and their decrease in the likelihood of seeking mother counseling. B 34. sales in the market of health and female beauty have declined a little in the last years. B 28. Effects of external pressure Example: Paragraph and; Answer: VIII 14. Jim Howard D. However, market analyst Kim Sawyer believes the future growth of the market can also be reached through the sale of sales sales sales sales sales sales sales sales salesarelit himitittitleareitit himle him him him himiteititleleitle himle himle himleite himleite from himiteteiteiteiteiteiteite himitete himate himitet himate himitetitititititit Sale of sale sales sales products unisex marketed for both sexes, this strategy becoming increasingly fanciful to implement, as the interest of men in appearance and hygiene became another social norm. 1. For this reason, it attributes this behavior in the influence of the predisposition genes in opposition to socially learned behavior. Reach this list of crothes and avoids situation of weakness of weakness, being excessively emotional or of form - lower, "he says, put a lot of pressure on many members of the men's population. Similar. C 24. 21. Kim Kim C. The pressures of modern life seem to have resulted in an increase in cases of emotional disharmony and government initiatives in many even, focused on increasing awareness and sympathy of the pill in general by suffering mental illness and related conditions . Choose the correct head for the B-D and F-G paragraphs in the list of tracks below. 25. Studies have shown that this distance is the main cause of disabilities in the northern love; In the United Kingdom, it is said that almost 3 million people are diagnosed with some form of depression at any time, and experts believe that more than 9 million cases can not be diagnosed. 28. Individuals that do not exhibit symptoms of disease are not used. All groups in the Lind experiment received along with specific raans that varied for each control group. However, these numbers are not unanimously supported, as some experts believe that the criteria of diagnosis used á ĉ ught á ĉ œ %A Condition. Precise enough, leading to other types of depression to be erroneously classified as a clinic "" \*e e Gradual products for men and women. Some recent studies, such as those published by the Archives of General Psychiatry, maintain that about a quarter of the diagnosed clinical depressive cases should actually be considered significant, but no common sadness and maladjustment to deal with rehearsals in life, indicating that in these cases, psychotherapy is required rather than treatment through the medicine. Immediate immediate It can be evaluated correctly, eight years normally passes between the stage of a drug that goes into clinical test and being approved for general use. Paragraph G questions 19 ä, ä ĉ "22 The following statements agree with the information provided in Reading Pass 2? True 23. 5. The clinical depression was originally attributed to the chemical imbalance in the CA © red, and as antidepressants working to optimize the levels of "good chemical" - serotonin and norepinephrine - are still commonly prescribed today, experts now believe that the beginning of depression can be caused by a number, and often combining physiological and medical-psychological factors. So restrictive the pressure of society can behave in a fashion Á ĉ ä ĉ ä ĉ ä ĉ ĉ "Professor Chesterton says, in many situations, men can respond in a way that they consider acceptable - society, given their role of perceived instead of giving what they can really consider to be the best and most objective answers. Phase 0 involves a first human assay (usually conducted using a small population frequently frequently) with the objective of verifying The effect of the drug is, in fact, the same as predicted in parent studies. The surface of a new phenomenon v. Other mothers were not convinced by their evidence. B. The depression Clinical is usually diagnosed when a subject is observed to display an excessively depressed humor and / or ä ĉ - Á "Andia äia ä ĉ" an inability to experience the pleasure of positive experiences, as it enjoys A meal or social interaction or social interaction Á ĉ ĉ "by a period of two weeks or more, together with five or more additional recognized symptoms. Male behavioral patterns have changed in a way that would have been considered implausible in the past. On the last one, a large of brands and companies that meet the enhancement of the male image were successfully established, success, Turning from only male spas, boutiques, toilettries, hair and skin care bands and male magazines with a strong inclination towards men's fashion. Phase 4: Precaution monitoring continues launching. The clinical test phase is much longer. Hereditarian predilection VIII. According to the research carried out on behalf of a retailer of health and beauty in the UK, the male cosmetic market and related products grew 800% since the year 2000 and should continue to increase significantly. Paragraph B 15. A. The impact of judgment findings were not used for full potential because A. One involving a single drug exposure the other involving one (37) . Lind's subjects for the first clinical essay were sailors who were in the to the condition in question. Displaying Symptoms 31. C 36. What paragraph is the following information? Revolution or recurrency? At this stage, the efficacy of a new drug is rigorously tested and compared to the best of existing alternatives already approved and in common use. Paragraph F 18. Influencing K. Influence on Minors VII. Estás that need to be fulfilled before the clinical trial - where treatment is truly tested on human matters - interpreting discovery, purification, characterization and laboratory tests. Many people undergoing counseling therapy do this in order to unlearn negative behavior and reactions. However, for HIV and Cancer drugs, this step is performed using patients suffering from a matter in question. Clinical depression can be triggered by divorce. F. G 14. Scarcity of laboratory personnel. folks.
